Read the text carefully, then do the following activities

Rainforests are forests characterized by biodiversity and high rainfall, with annual rainfall between 250 and 450 centimeters. There are two types of rainforest: tropical rainforests and temperate ones. Tropical rainforests are characterized by a warm and wet climate with no substantial dry season: typically found within 10 degrees north and south of the equator in areas such as South America, Southeast Asia and Sub-Saharan Africa. Temperate rainforests, however, are only found in few temperate regions around the world such as Europe, North America and East Asia.

Around 40% to 75% of all biotic species are indigenous to the rainforests. It has been estimated that there may be many millions of species of plants, insects and microorganisms still undiscovered in tropical rainforests. Tropical rainforests have been called the "world's largest pharmacy", because over one quarter of natural medicines have been discovered there. Rainforests are also responsible for 28% of the world's oxygen turnover; that is why tropical forests are also called "Earth's lungs."

Rainforests produce many items that we all use in our daily life. They also have value as tourism destinations. Tropical rainforests provide timber as well as animal products such as meat and hides.

(08 pts)

A / Comprehension :

1. Say whether each of the following statements is true or false.

- Tropical rainforests and the temperate ones are the same.
- Equatorial areas are warm and wet.
- All species of plants, insects in tropical rainforests are still undiscovered.
- Rainforests are not valuable to tourists.

2. Answer the following questions according to the text :

- What is the weather like in tropical rainforests ?
- What is the source of wood ?
- How much oxygen do rainforests produce ?
- Why are rainforests named earth's lungs ?

3. Choose the best title to the text.

- Amazon rainforests
- The characteristics of tropical rainforests
- The source of timber

4. What/ who do the underlined words in the text refer to ?

a. there (§2):

b. They (§3) :

B/ Text Exploration :

(07 pts)

1. Find in the text words or phrases that are

A. closest in meaning to

a. biggest (§2) =

b. wood (§3) =

B. opposite in meaning to

a. low (§1) ≠

2. Write sentence 'b' so that it means same as sentence 'a'

1. a. One quarter of natural medicines have been discovered there.

b. **Scientists**

2. a. Natural resources must be protected by us

b. **We**

3. Fill in the blanks with the appropriate modals so as to express the notions between brackets:

- a- The tropical animalslive elsewhere. (inability)
- b- Visitorskeep these forests clean . (obligation)
- c- The Brazilian government build new roads to access the Amazon rainforests. (obligation in the past)

4. Correct the form of the verb between brackets in the following , and mark the intonation at the end using arrows

- a- Do you mind (to answer) some questions, please?
- b- all right.

Part two : Written Expression

(05 pts)

Choose one of the following topics.

Either

Topic one:

What should people do to protect the nature, especially the tropical rainforests? Why?

OR

Topic two: Every day Palestinian people are being killed by Israeli army and Palestinian children are living under occupation without any basic necessities of life. Take turn of the Palestinian children to deliver a speech about their dreams.

Use the following notes to write a paragraph where you express your wishes.

Start like this : *As a palastenian child I have a dream*

- Independent state / End of occupation. / practise civil rights. /Live in peace / enjoy Freedom. /food supply/education.....etc.....
